

On July 16, 2010 the City of Oshawa, along with the Government of Canada, announced it is investing in major improvements to the Port of Oshawa that will boost the Port as an attraction for families and visitors and support new jobs and business opportunities in the Region.

In order to help the City get a better understanding of the features and services that should be included in a Marina development, we ask for your feedback and suggestions to help the City of Oshawa's Port of Oshawa chart a new course....
